F05-0123 Relay Board

F05-0123 components pictured above

The F05-0123 is a pinhole detector relay conversion kit. It replaces the obsolete high voltage relays and is utilized for output signals from the pre-amp board on the rack of the pinhole detector.

It is comprised of a B05-0480 circuit board with 2 relays, wire, miscellaneous hardware, and heat shrink tubing. Included in the instructions is an assembly drawing, a conversions wire chart and a CD with detailed installation instructions.
